

## Project description Interface Onboard and AsiX at PROGRESS GROUP

The PROGRESS GROUP implements plants, machines and software for precast concrete plants. Building with precast concrete improves living conditions for people worldwide. With innovative technology, Progress creates attractive jobs and environmentally friendly, durable construction systems for high-quality living and working spaces.

The 700 employees are the company's great asset. To ensure that the complex processes in human resource management from the introduction of new employees to training planning, occupational medical examinations, accident analyses, handouts, due dates and competence assessment as well as the topics of occupational safety, environmental protection, D.lgs. 231/01 and quality management run efficiently and without errors, these are managed with the AsiX management software.

For the areas of recruiting, onboarding of new employees as well as employee management and development, the Progress Group has been using "onboard" for several years. This software helps companies to optimize their employee search and to better organize and manage existing employees.

Progress will continue to rely on both systems, onboard and AsiX, in the future and therefore decided to exchange data and implement an interface, which was successfully completed within a short period of time and brings the following advantages:

- Time saving
- Increased data reliability
- Error prevention
- Automated updating of data
- Increased legal certainty

Feedback from Joachim Niederkofler - HR Manager at Progress Group

"Through the interface of Asix with our recruiting and employee tool Onboard, we will be able to combine the strengths of both tools in the future and use them even better. The management of the common information around our employees will be much easier and the quality in processing will increase significantly. The implementation of the interface was very professional, fast and secure."

The interface between AsiX and onboard has already been implemented at the following companies: Bagnara AG, Progress Group, X-Timber AG (ex Holz Pichler AG), Nordwal AG, SYSTENT Group (SYSTENT GmbH, TechniZert GmbH, ProSanitas GmbH).

Onboard and AsiX also digitalise and optimise your HR processes.
